FusionAuth
Auth for Any App.

Compare FusionAuth to Auth0

FusionAuth and Auth0 have core features required by modern customer identity and access management solutions: Authentication for web and mobile applications, OAuth tokens & API key management, SSO, and MFA.

Unlike Auth0, FusionAuth is easy to install with just a single command and is 100% free for unlimited users. FusionAuth also supports multiple-platforms and provides flexible deployment options, true data isolation, theme support, localization, and much more.

FusionAuth also installs on any server, anywhere in the world, for complete user data control. Use the chart below to compare our features and read more in our **API documentation**.
